

SHINE ON ME

Price guide

We cannot give you an exact cost for the restoration of your trim without a personal, up-close and accurate assessment by myself and my metal team. However, we can give you a sampling of our latest projects.

Please note we now are covering all makes and models of automotive trim, and we specialize in premium, show-presentable work. We are not a production shop, and we treat each item as though it were our own. We take joy in knowing we have brought back each piece to as close to original as is humanly possible!

We recommend you ship your trim to us direct, enclosing payment for return shipping. Contact us via phone or email to let us know your pieces are on their way. We will do a complete assessment, and get back to you right away with exact cost. If this is acceptable to you, we go right to work. If not, the pieces are returned immediately, no questions asked. All we ask is that you respectfully enclose return shipping costs with your order when you send your trim for assessment. Turn around time is currently 6-10 weeks, with the exception of plastic dash sets, which require a much longer time duration.

Note: These prices do not reflect added shipping costs. All factory airbrush detailing is available at extra charge, on a per hour basis.

1963 Ford Falcon Grille, detailed	745
